SEWER INSTALLATION CERTIFICATE

(As Required by UPC Sec. 718.1, Exception)

Project Name

Date

Project Address

Log No.

ACCEPTANCE OF SEWER DESIGN BY OWNER (UPC Section 718.1)

(To be filled in and signed by owner before permit is issued)

As owner of the above project, we have been advised that the elevations of the proposed buildings and the depth of the existing sewer main will not allow our building sewers to slope at 1/8 of an inch per foot as specified in the Uniform Plumbing Code.

We have also been advised that our sewers, if installed at a lesser slope, will possibly require increased maintenance. However, we are willing to accept the lesser slope. The installation of the slope of the system will be Certified by a Licensed Engineer or Surveyor.

Name of Licensed Engineer or Surveyor

Signature of Owner

ACKNOWLEDGEMENT

(To be filled in and sealed before plumbing permit is issued)

To the best of my knowledge the design of this sewer system is proper and will perform satisfactorily. I further acknowledge and certify that the installation of the sewer will be in accordance with the approved design and installed to the grades shown on the plans.

Place registration seal
and signature above

Registered Engineer or Surveyor

CERTIFICATE OF COMPLIANCE

(To be filled in and sealed before occupancy certificate is issued)

I certify that the sewer installation has been completed according to the approved design and installed to the grades shown on the plans.

Place registration seal
and signature above

Registered Engineer or Surveyor
